

MAKE YOUR OWN DREIDEL!

1. Cut out the dreidel along the outside edge.
2. Carefully poke a pencil through the dotted circle to make a hole.
3. Fold along the dotted lines to make the shape of your dreidel and the flaps.
4. Glue or tape the flaps as shown to put your dreidel together. (Taping is easier!)
5. Push the pencil back through the hole until the point sticks out at the bottom. This will be the handle you use to spin the dreidel.
